

How to avoid delays over WHITE

*Utilizing the Off Shore Route
aka the AZEZU route*

WHITE is used by EWR, LGA, and HPN as well as TEB for traffic heading down the east coast, resulting in heavy demand and inevitable delays during peak times.

For flights destined to the Florida terminals, AZEZU is an option

Route to file:
KTEB ELVAE COL DIXIE PREPI UNYAD OWENZ POPPN
OHRYN BEHR WEBBB HOBCH PAEPR M201

HOBOH

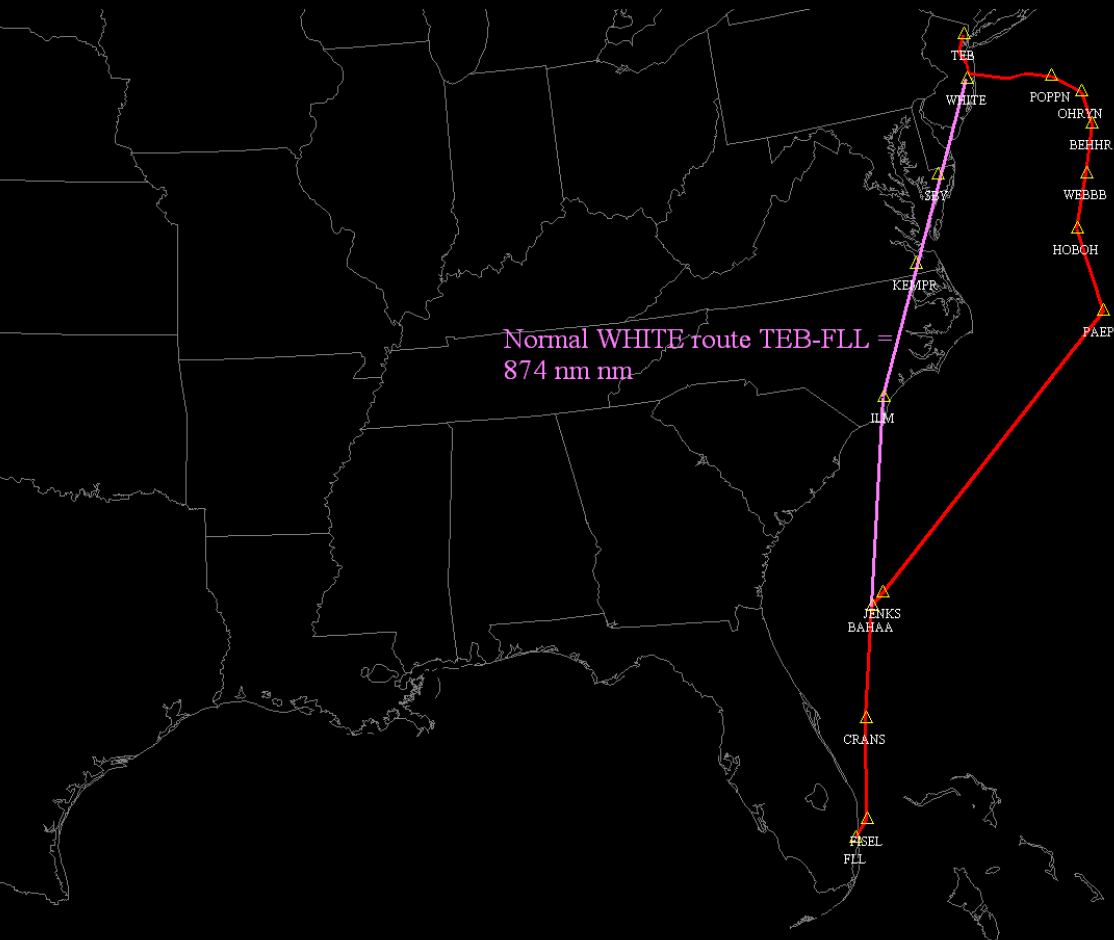

PAEPR

JENKS
BAHAA

Route to file:
KTEB ELVAE COL DIXIE PREPI UNYAD OWENZ POPPN
OHRYN BEHR WEBBB HOBOH PAEPR M201
then BAHAA AR15 or 21 to MCO/FLL/west coast FL
or JENKS AR19 or AR22 to BCT /PBI/MIA

CDM Operational Coded Departure Routes Database Query

- RMT Webservice: 1.50
- Effective 03/29/2018 until 05/24/2018

Enter one or more of the available fields to search the CDM Operational Coded Departure Routes (CDR) database. Fields left blank will return all values of that field. You can include AND ('&'), OR ('|'), and/or NOT ('!') in your request.

- **Route Code:** 8 character route code.
- **Origin:** 3 or 4 character departure airport designator.
- **Destination:** 3 or 4 character arrival airport designator.
- **Departure Fix:** Departure fix.
- **Route String:** All or any part of the route string.
- **Departure ARTCC:** 3 character center code.
- **Arrival ARTCC:** 3 character center code.
- **Traversed ARTCCs:** 3 character center codes.
- **Coordination Required:** coordination required when filing this route (Y/N).
- **Nav Eqp:** navigation equipment designator (1 - basic navigational routes, 2 - routes with RNAV DPs and/or STARs, 3 - routes with Q-route segments and/or pitch and catch points).
- **Associated Play:** All or any part of a Playbook Play name.
