Snow Clearing Strategy

- Tested during the 2019-2020 snow season
- Shift in snow clearing priority to maintaining single runway safety rather than two runways
- Focus snow removal efforts on primary runway
 - Close non-priority runway for the duration of the storm

Snow Clearing Strategy

- **Benefits**
 - Safer runway surface conditions – more flexibility to plow as needed
 - Reduce closure lengths to 30 minutes or less
 - Less disruption to the NAS – allows NY TRACON to plan better for TEB arrivals
 - Reduces lengthy holding times
 - Safer operating conditions for plow and aircraft operators – reduces the likelihood of a vehicle incursion or ground collision
- **Drawbacks**
 - Longer clean up time for the non-priority runway following the storm

Future Manager's Meetings

- Snow removal stats will be reported at TEB Manager's Meetings from November 2020 through April 2021.
